

CURRENT POSITION AND STATUS

- INRA Research scientist.

EDUCATION

- 2006: PhD in Microbiology and Virology, Paris VII, France.
- 2002: Master's Degree in Biochemistry, Paris VI, France.

RESEARCH EXPERIENCE

- Since 2013: Senior Scientist, P. Serror's team, Micalis Institute, INRA, Jouy en Josas.
E. faecalis intestinal translocation and host response.
- 2009-2012: Post-doctoral fellow, P. Cossart's unit, Pasteur Institute, Paris.
Effect of commensals and probiotics on the enteropathogenicity of *Listeria monocytogenes*.
- 2006-2008: Post-doctoral fellow, B. Malissen's team, Centre d'Immunologie de Marseille-Luminy, Marseille.
Project 1: Role of macrophages and dendritic cells in *Brucella* infection *in vivo*.
Project 2: Pathways involved in the lymphoproliferative disorder occurring in mice with point mutation in the gene coding for the LAT adaptor.
- 2002-2006: PhD, P. Cossart's unit, Pasteur Institute, Paris.
Role of the serine-threonine phosphatase Stp in the infectious process of *L. monocytogenes*

RESEARCH INTERESTS

- Interactions of intestinal pathobionts with the host and the microbiota.
- *Ex-vivo* and *in vivo* models.
- Preventive anti-enterococcal strategies.
